

SARA KHALED

Frontend Software Developer

+20100600986 | sarakhaled95@gmail.com | linkedin.com/in/sara-khaled95 | Alexandria, Egypt

PROFILE SUMMARY

As a recent software development graduate, I offer a unique blend of technical expertise and problem-solving skills. With a background in architecture, I've transitioned strategically to software engineering, equipped with strong proficiency in Python and JavaScript, along with frameworks like React and Node.js. I excel in translating business needs into practical software solutions and thrive in dynamic, collaborative environments. A quick learner with a passion for innovation, I am well-prepared to contribute effectively to your team, delivering high-quality, user-centric applications.

SKILLS

PROFESSIONAL SKILLS

Problem solving - Decision making - Presentation skills - Critical thinking - Analytic thinking - Continuous learning - Documentation - Process improvement - Excellent communication skills

TECHNICAL SKILLS

Python - JavaScript - HTML - CSS - React.js - Bootstrap - Restful API Integration - MySQL

EXPERIENCE

PROJECTS

FOOD RECIPE APPLICATION

Designed and developed a cross-device compatible food recipe application using React.js, integrating APIs to provide users with real-time access to a vast database of recipes. The application features a user-friendly interface designed for intuitive navigation and enhanced user experience. Key functionalities include recipe search, ingredient lists, aimed at simplifying meal planning and enhancing culinary exploration.

WEATHER WEB APPLICATION

Created a weather application using HTML, CSS, and JavaScript, featuring API integration for real-time weather updates and forecasts.
